

***Welcome to UASPACE!***

Greetings, UASPACE Alumni and Supporters! We hope your 2025 has been going well, and we have some exciting updates to share about UASPACE's progress on BAMA-2 as well as our community outreach events!

## *January and February*

Our semester started with **Get On Board Day** in January where we displayed our new recruitment displays. The posters are easier to read, guiding students through UASPACE's history and current projects.

In February, we hosted UASPACE's first project manager, **Piper Daniels**, who shared her story with us through a Q&A session! Piper gave our team advice on internships, career planning, and BAMA-2. We're very appreciative of her continued support, and we're so proud of her for receiving the prestigious 18 Under 31 Award from UA!

Later in February, our team had a chance to share CubeSat knowledge with high school students on the Shelby Quad for **E-Day**. Big Al even stopped by for a photo with us!

## Space Day

At the end of February, a few of our team leads attended **Space Day** in Montgomery, AL, showcasing our team at the Alabama State Capitol! Our team leads had the chance to connect with high school students, local communities, and some of our fellow engineering student organizations from across the state. Our team leads even had the chance to gain valuable insights from industry partners pertaining to careers in space and defense.

## March

We hosted **general elections** in March. New officers and team leads will work underneath their predecessors for the next few months to ensure officer turnover is efficient. Our new officers are looking forward to these new positions! Our graduating seniors are also writing **Standard Operating Procedures** to document processes they have performed for future students to read.

We also participated in our first **Know Your Noodle** evening at the Tuscaloosa Public Library. We have three total events planned with TPL where we showcase engineering activities with 8-12 year old students.

## *Some Updates!*

Our team wrote and designed a **Sponsorship packet** for potential donors. We took this packet to Space Day and will share it this semester. If you would like to support BAMA-2 and UASPACE, email us at [uaspace@ua.edu](mailto:uaspace@ua.edu).

Our **STEM MBA** team is composing an alumni database to connect UASPACE members with alumni. If you are an alumni and have not filled out the form for the database, please do so [here!](#)

We look forward to ending the semester strong, continuing our work on BAMA-2, and continuing our community outreach!

## *Thank You to Our Sponsors!*
